

# Astra Hybrid330

Ultra compact hybrid moving beam-spot, with a 330W LED Source

---

## USER MANUAL

---

## ***Thank you for choosing PROLIGHTS***

Please note that every PROLIGHTS product has been designed in Italy to meet quality and performance requirements for professionals and designed and manufactured for the use and application as shown in this document.

Any other use, if not expressly indicated, could compromise the good condition/operation of the product and/or be a source of danger.

This product is meant for professional use. Therefore, commercial use of this equipment is subject to the respectively applicable national accident prevention rules and regulations.

Features, specifications and appearance are subject to change without notice. Music & Lights S.r.l. and all affiliated companies disclaim liability for any injury, damage, direct or indirect loss, consequential or economic loss or any other loss occasioned by the use of, inability to use or reliance on the information contained in this document.

Product user manual can be downloaded from the website [www.prolights.it](http://www.prolights.it), or can be inquired to the official PROLIGHTS distributors of your territory ([https://www.prolights.it/sales\\_network.html](https://www.prolights.it/sales_network.html)).

Scanning the below **QR Code**, you will access the download area of the product page, where you can find a broad set of always updated technical documentation: specifications, user manual, technical drawings, photometrics, personalities, fixture firmware updates.

**Visit the download area  
of the product page**

# SAFETY INFORMATION

## WARNING!

- See <https://www.prolights.it/product/ASTRAHYB330#download> for installation instructions.
- Please read carefully the instruction reported in this section before installing, powering, operating or servicing the product and observe the indications also for its future handling.

**This unit is not for household and residential use, only professional applications.**

## Connection to mains supply

- The Connection to the mains supply must be carried out by a qualified electrical installer.
- Use only AC supplies 100-240V 50-60 Hz, the fixture must be electrically connected to ground (earth).
- Select the cable cross section in according with the maximum current draw of the product and the possible number of products connected at the same power line.
- The AC mains power distribution circuit must be equipped with magnetic+residual current circuit breaker protection.
- Do not connect it to a dimmer system; doing so may damage the product.

## Protection and Warning against electrical shock

- Do not remove any cover from the product, always disconnect the product from AC power before servicing.
- Ensure that the fixture is electrically connected to ground (earth). And use only a source of AC power that complies with local building and electrical codes and has both overload and ground-fault (earth-fault) protection.
- Before using the fixture, check that all power distribution equipment and cables are in perfect condition and rated for the current requirements of all connected devices.
- Isolate the fixture from power immediately if the power plug or any seal, cover, cable, or other components are damaged, defective, deformed or showing signs of overheating.
- Do not reapply power until repairs have been completed.
- Refer any service operation not described in this manual to PROLIGHTS Service team or an authorized PROLIGHTS service center.

## Installation

- Make sure that all visible parts of the product are in good visible condition before its use or installation.
- Make sure the point of anchorage is stable before positioning the projector.
- When suspending the fixture above ground level, secure it against failure of primary attachments by attaching a safety cable that is approved as a safety attachment for the weight of the fixture to the attachment point on the main frame of the product. In case the safety cable, enter in action, it needs to be replaced with a new one.
- Install the product only in well ventilated places.
- For non temporary installations, ensure that the fixture is securely fastened to a load-bearing surface with suitable corrosion-resistant hardware.
- For a temporary installation with clamps, ensure that the quarter-turn fastener and/or screws are turned fully, and secured with a suitable safety cable.

## Minimum distance of illuminated objects

- The projector needs to be positioned so that the objects hit by the beam of light are at least XX meters (XX ft) from the lens of the projector.

TBC

TBC

**Max operating ambient temperature (Ta)**

- Do not operate the fixture if the ambient temperature (Ta) exceeds XX °C (XX °F).

TBC

**Minimum operating ambient temperature (Ta)**

- Do not operate the fixture if the ambient temperature (Ta) is below XX °C (XX °F).

**Protection from burns and fire**

- The exterior of the fixture becomes hot during use. Avoid contact by persons and materials.
- Ensure that there is free and unobstructed airflow around the fixture.
- Keep flammable materials well away from the fixture.
- Do not expose the front glass to sunlight or any other strong light source from any angle. Lenses can focus the sun's rays inside the fixture, creating a potential fire hazard.
- Do not attempt to bypass thermostatic switches or fuses.

**Indoor use**

- This product is designed for indoor and dry environments.
- Do not use in wet location and do not expose the fixture to rain or moisture.
- Never use the fixture in places subject to vibrations or bumps.
- Make certain that no inflammable liquids, water or metal objects enter the fixture.
- Excessive dust, smoke fluid, and particle build up degrades performance, causes overheating and will damage the fixture.
- Damages caused by inadequate cleaning or maintenance are not covered by the product warranty.

**Light collimation optical system**

- This product contains internal light collimation optical system. Avoid to expose the optical system to any intense source of light (including sunlight) from any angle.

TBC

**Temperature of the external surface**

- The surface of the fixture can reach up to XX °C (XX °F) during operation. Avoid contact with people and materials.

**Radio receiver**

This product contains a radio receiver and/or transmitter:

- Maximum output power: 17 dBm.
- Frequency band: 2.4 GHz.

**Maintenance**

- Warning! Disconnect the fixture from AC mains power and allow to cool for at least 10 minutes before handling.
- Only technicians who are authorized by PROLIGHTS or Authorised service partners are permitted to open the fixture.
- Users may carry out external cleaning, following the warnings and instructions provided, but any service operation not described in this manual must be referred to a qualified service technician.
- Important! Excessive dust, smoke fluid, and particle build up degrades performance, causes overheating and will damage the fixture. Damages caused by inadequate cleaning or maintenance is not covered by the product warranty.

**Photobiological safety**

- This device emits potentially dangerous optical radiation and is identified in the category of Risk Group 2 according to EN 62471.

### Do not stare at the operating light source

- Do not look directly at the LED source during operation. It can be harmful to the eyes and skin.
- During Installation, operation and maintenance, be prepared for the fixture to light and move suddenly when connected to power.
- The device should be positioned so that prolonged staring into the luminaire at a distance closer than XX m (XX ft) is not expected.

TBC

### Disposal

- This product is supplied in compliance with European Directive 2012/19/EU – Waste Electrical and Electronic Equipment (WEEE). To preserve the environment please dispose/ recycle this product at the end of its life according to the local regulation.

### The product contains a lithium ion battery

- Don't throw the unit into the garbage at the end of its lifetime.
- Make sure to dispose according to your local ordinances and/or regulations, to avoid polluting the environment!
- The packaging is recyclable and can be disposed.

### The products to which this manual refers comply with:

- 2014/35/EU - Safety of electrical equipment supplied at low voltage (LVD).
- 2014/30/EU - Electromagnetic Compatibility (EMC).
- 2011/65/EU - Restriction of the use of certain hazardous substances (RoHS).
- 2014/53/EU - Radio Equipment Directive (RED).

### The products to which this manual refers comply with:

- UL 1573 + CSA C22.2 No. 166 - Stage and Studio Luminaires and Connector Strips.
- UL 1012 + CSA C22.2 No. 107.1 - Standard for power units other than class 2.

### FCC Compliance:

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
  1. This device may not cause harmful interference, and
  2. This device must accept any interference received, including interference that may cause undesired operation.

### Other approvals

# 1 - PACKAGING

## PACKAGE CONTENT

- 1x ASTRAHYB330.
- 1x 1,5 meters power cable (BARE END - NEUTRIK POWERCON TRUE1 IP65).
- 2x OS24.
- User Manual.

## OPTIONAL ACCESSORIES

- FCLASTRAP400: flight case for 3 pcs of ASTRAHYB330.
- OS24: quick-lock omega bracket, M10 hole.
- C6002A/B: slim aluminum clamp, 200kg loading, 48-51mm tubes, M10 bolt, silver/black.
- RSR0670A/B: steel security cable for hanging bodies, inox steel shackle, L=60 cm, silver/black.
- 9533FXWL03: ass. 3x2.5mm TH07 cable, SHUKO plug, MENAC3FXW socket, L.3m.
- 9513FXWL03: ass. 3x2.5mm TH07 cable, 16A 3p 230V CEE plug, MENAC3FXW socket, L.3 m.
- 958225L03: 3x2.5mm TH07 Cable, 16A 3p PwCon MXW, 16A 3p PwCon FXW, L. 3m.
- TOUR53415L03: dmx cable HC5340. CANC5MXX XLR 5p->CANC5FXX XLR (f) 5p, L.3m.
- WSBBF1G5: blackBox F-1 G5 transmitter, 2,45GHz & 5.2/5,8 GHz, DMX/RDM, 512Ch.
- WSBBF1G6: blackBox F-1 G6 transrec, 512ch, 2.45GHz, DMX&RDM,Bluetooth,G3,G4,G4S, G5, CRMX.
- WSBBR512G5: blackBox R-512 G5 receiver 512Ch, 2.45GHz & 5.8GHz, DMX/RDM optional.
- WSBBR512G6: blackBox R-512 G6 receiver 512Ch, 2.45GHz,DMX&RDM,Bluetooth,G3,G4,G4S,G 5,CRMX.
- UPBOX2P5: firmware uploader kit, USB IN, 5-pin XLR DMX OUT.

# 2 - TECHNICAL DRAWING

Weight: 21,60 kg - 47,61lbs

Fig. 01

# 3 - PAN AND TILT LOCK

PAN Mechanism lock and release

TILT Mechanism lock and release

Fig. 02

# 4 - INSTALLATION

## MOUNTING

Check that the supporting structure can safely bear the weight of all installed fixtures, clamps, cables, auxiliary equipment, etc. and complies with locally applicable regulations.

When suspending the fixture above ground level, secure it against failure of primary attachments by attaching a safety wire that is approved as a safety attachment for the weight of the fixture to an anchor point on the product main frame.

Do not use removable parts or weak anchors for secondary attachment.

Warning! When clamping the fixture to a truss or other structure at any angle, use clamps of half-coupler type. Do not use any type of clamp that does not completely encircle the structure when fastened.

Fig.03

## 5 - CONNECTION TO THE MAINS SUPPLY

**WARNING:** For protection from electric shock, the fixture must be earthed!

The product is equipped with auto-switching power supply that automatically adjusts to any 50-60Hz AC power source from 100-240 Volts.

If you need to install a power plug on the power cable to allow connection to power outlets, install a grounding-type (earthed) plug, following the plug manufacturer's instructions. If you have any doubts about proper installation, consult a qualified electrician.

The max power consumption is 517W.

Core (EU)	Core (US)	Connection	Plug terminal marking
Brown	Black	Live	L
Blue	White	Neutral	N
Yellow+green	Green	Earth	

## 6 - START UP

### CONNECT AND DISCONNECT POWER FROM THE PRODUCT

To apply and disconnect power to the product:

- Check that the product is installed and secured as indicated in the Safety Informations, and that personal safety will not be put at risk when the fixture lights up.
- Connect the power connector into the Mains input socket (100-240 VAC-50/60 Hz).
- The product is then ready for its operations and can be controlled through the available input signals on board.
- To disconnect power from the product, disconnect the Mains from the socket.

## 7 - PRODUCT OVERVIEW

1. USER INTERFACE with display and buttons for access to the control panel functions.
2. PAN Mechanism lock and release.
3. TILT Mechanism lock and release.
4. ANTENNA of Wireless DMX Receiver internal module.
5. ETHERCON CONNECTORS IN / OUT signal.
6. DMX OUT (5-p XLR): 1 = GND, 2 = sign-, 3 = sign+, 4 N/C, 5 N/C.
7. DMX IN (5-p XLR): 1 = GND, 2 = sign-, 3 = sign+, 4 N/C, 5 N/C.
8. SAFETY EYE to attach safety cable.
9. POWER OUT: power output for connection of multiple units in series.
10. POWER IN: for connection to the Mains 100-240V~/50-60Hz.
11. MAIN FUSE HOLDER: replace a burnt-out fuse by one of the same type only (T8A 250V).

Fig 04

# 8 - DMX CONNECTION

## CONNECTION OF THE CONTROL SIGNAL: DMX LINE

The product has XLR sockets for DMX input and output.  
The default pin-out on both socket is as the following diagram:

### DMX - INPUT XLR plug

- Pin1 : GND - Shield
- Pin2 : - Signal
- Pin3 : + Signal
- Pin4 : N/C
- Pin5 : N/C

### DMX - OUTPUT XLR socket

Fig. 05

## INSTRUCTIONS FOR A RELIABLE DMX CONNECTION

Use shielded twisted-pair cable designed for RS-485 devices: standard microphone cable cannot transmit control data reliably over long runs. 24 AWG cable is suitable for runs up to 300 meters (1000 ft). Heavier gauge cable and/or an amplifier is recommended for longer runs.  
To split the data link into branches, use splitter-amplifiers in the connection line.  
Do not overload the link. Up to 32 devices may be connected on a serial link.

## CONNECTION DAISY CHAIN

Connect the DMX data output from the DMX source to the product DMX input (male connector XLR) socket.  
Run the data link from the product XLR output (female connector XLR) socket to the DMX input of the next fixture.  
Terminate the data link by connecting a 120 Ohm signal termination. If a splitter is used, terminate each branch of the link.  
Install a DMX termination plug on the last fixture on the link.

## CONNECTION OF THE DMX LINE

DMX connection employs standard XLR connectors. Use shielded pair-twisted cables with 120Ω impedance and low capacity.  
The following diagram shows the connection mode:

Fig. 06 - Example 29 DMX channels configuration

## CONSTRUCTION OF THE DMX TERMINATION

The termination is prepared by soldering a  $120\Omega$  1/4 W resistor between pins 2 and 3 of the male XLR connector, as shown in figure.

Fig. 07

## DMX ADDRESSING

In order to start controlling the product via DMX, the first step is to select a DMX address, also known as the start channel, this is the first channel used to receive instructions from a DMX controller. If you wish to control the product individually, it is necessary to assign a different starting address channel to each fixture.

The number of channels occupied from the product depends on the DMX mode selected, so always verify the DMX Mode in the MENU before start addressing.

If you assign two fixtures the same address, they will be executing the same behaviour. Selecting the same address to multiple fixtures can be useful for diagnostic purposes and symmetrical control.

DMX addressing is limited to make it impossible to set the DMX address so high that you are left without enough control channels for the product.

To set the fixture's DMX address:

1. Press ENTER to open the main menu.
2. Reach the addressing menu, then select the DMX ADDRESS settings.
3. Select the address from 1 to 512 using the navigation arrows/buttons and confirm by pressing ENTER.
4. Press Menu to exit and return to the Home screen.

## ETHERNET CONNECTION

The product is provided with two 8-pin RJ-45 sockets for Ethernet input/output for a simple daisy chain connection to the network.

The product can be controlled with ArtNet/sACN/Klingnet communication protocol.

Use a network cable category 5 (with four "twisted" wire pairs) and standard RJ-45 plugs.

## ETHERNET OPERATION

Please refer to the section MENU STRUCTURE contained in this document for detailed information about the parameters of setting on the fixture (Protocol, Net, Subnet, Universe, Start Channel and IP Address, Ethernet to DMX No/Yes).

- IP addresses recommended: 002.xxx.xxx.xxx or 010.xxx.xxx.xxx.
- The submask net is fixed at 255.0.0.0.

## ETHERNET TO DMX OPERATIONS

Please refer to the section MENU STRUCTURE contained in this document for detailed informations. This function allow a product receiving an ethernet signal protocol to re-transmit the incoming signal onto a wired DMX line through its onboard XLR-out connector.

- An Ethernet protocol (Artnet, sACN or others available) has to be enabled from Ethernet menu at first fixture. **Please make sure that wireless receiver is switched to OFF if you use Ethernet communication.**
- Enable the option Ethernet To DMX choosing which fixture needs to be retransmitted (Main Fixture or Pixel Engine) from the Ethernet menu at the first product (connected to the Ethernet) in the signal chain, next products have standard DMX setting.
- Connect the Ethernet input of the first product in the data chain with the network. Connect the DMX output of this product with the input of the next product until all products are connected to the DMX chain.
- Caution: At the last product, the DMX chain has to be terminated with a terminator. Solder a 120  $\Omega$  resistor between Signal (-) and Signal (+) into a XLR-plug and connect it in the DMX-output of the last product.

## OPERATION AS A WIRELESS TRANSMITTER

ASTRAHYB330 can be used as wireless transmitter to transmit DMX signal to different wireless receivers. To use ASTRAHYB330 as wireless transmitter, please follow the procedure below:

1. Push ENTER button until you show CONNECT on display, then press ENTER button to confirm.
  2. Use UP/DOWN buttons for select WIRELESS, then press ENTER to confirm.
  3. Push ENTER button on WDMX ON/OFF function and enable it to ON.
  4. Select WDMX mode and set it on Transmitter (please note that WDMX mode will be available only if WDMX ON/OFF is set to ON).
  5. Ensure that the receiver units are not connected to any other transmitter. Please refer to "Reset the receiver" paragraph.
  6. Enable TX LINK to ON to link transmitter to receivers (please note that TX LINK will be available only if WDMX mode is set to Transmitter).
- The transmitter scans for all unlinked receivers for a period of about 5 seconds.
  - If the connection fails, check the position of the receiver.
  - The wireless icon on the receiver display indicates the received signal strength.

## Unlinking the transmitter

Follow the procedure below to unlink the transmitter from all receivers connected with the unit.

1. Push ENTER button until you show CONNECT on display, then press ENTER button to confirm.
  2. Use UP/DOWN buttons for select Wireless, then press ENTER to confirm.
  3. Enable TX UNLINK to ON 8 (please note that TX UNLINK will be available only if WDMX mode is set to Transmitter).
- All connected receivers will be unlinked.

## IN TO WDMX

This function enable or disable the transmission through wireless of the DMX signal from the transmitter side to the receiver.

Any incoming signal (ArtNet, sACN or DMX) is retransmitted through wireless. It's possible to choose retransmission of Main Fixture or Pixel Engine.

If the ASTRAHYB330 protocol selected is ArtNet / sACN, the WDMX module will retransmit the DMX values contained in the ArtNet / sACN signal received from the ASTRAHYB330.

**NOTE:** Artnet and sACN have higher priority on DMX if they are connected to transmitter.

**NOTE:** Do not use IN TO WDMX and ETH TO DMX simultaneously, this will cause data conflict on DMX output signal.

## **OPERATION AS A WIRELESS RECEIVER**

ASTRAHYB330 can be used as wireless receiver connected to a wireless transmitter.

To use ASTRAHYB330 as wireless receiver, please follow the procedure below:

1. Push ENTER button until you show CONNECT on display, then press ENTER button to confirm.
2. Use UP/DOWN buttons for select Wireless, then press ENTER to confirm.
3. Push ENTER button on WDMX ON/OFF function and enable it to ON.
4. Select WDMX mode and set it on Receiver (please note that WDMX mode will be available only if WDMX ON/OFF is set to ON).
5. Enable RX RESET to ON to reset the receiver (please note that RX RESET will be available only if WDMX mode is set to Receiver).
6. On the transmitter, enable TX LINK to ON to link transmitter to the receivers.
7. If the connection is successful and DMX input is available the display the display on the receiver unit will shows the DMX address. If DMX signal is not available, the display will shows "No signal" but keeps the transmitter linked.
8. If the connection fails, check the position of the receiver.
9. The wireless icon on the receiver display indicates the received signal strength.

### **Reset the receiver**

Follow the procedure below to reset the receiver.

1. Push MENU button until you show CONNECT on display, then press ENTER button to confirm.
2. Use UP/DOWN buttons for select Wireless, then press ENTER to confirm.
3. Enable RX RESET to ON.
- The wireless icon on the receiver display indicates the received signal strength.

### **WDMX TO DMX (RX)**

This function enable or disable the retransmission of the wireless DMX signal received through the DMX port on the receiver side.

# 9 - CONTROL PANEL

The product has a display and buttons for access to the control panel functions.

Fig. 08

## DISPLAY AND BUTTONS LAYOUT

The product has a display and buttons for access to the control panel functions:

	<p>1 </p> <p>2 </p> <p>3 </p> <p>4 </p> <p>5 </p>	<ul style="list-style-type: none"> <li>• Browse upwards through the menu list and increases the numeric value displayed.</li> <li>• Return to the top level.</li> <li>• Browse downwards through the menu list and decreases the numeric value displayed.</li> <li>• Commute from units, tens, hundred in the menu.</li> <li>• Used to access the menu tree or to return a previous menu window.</li> </ul>
<p> BATTERY</p>	<ul style="list-style-type: none"> <li>• Switch on the display using backup battery. Hold for 5s.</li> <li>• Switch off display by pressing button 4 for 5s while on being on Home screen.</li> </ul>	
<p>W-DMX </p>	<ul style="list-style-type: none"> <li>• LED indicator for Wireless dmx (color red and green).</li> </ul>	
<p> ETHERNET</p>	<ul style="list-style-type: none"> <li>• LED indicator for Ethernet network.(color orange).</li> </ul>	

# 10 - MENU STRUCTURE

The following chart describes the MENU tree of the product, the terms shown in **BOLD** indicates the default settings.

1	CONNECT	ADDRESS	DMX	VALUE (1-512)		Set address used for Fixture and for Pixel patch.	
			W-DMX				
			sACN				
			ARTNET				
		DMX MODE	<b>STANDARD</b>			Set DMX chart for Main Fixture.	
		WIRELESS	WDMX ON/OFF	ON/OFF		Enable/Disable the wireless card.	
			WDMX MODE	TRANSMITTER/ <b>RECEIVER</b>		Allows to choose whether to set the wireless on the Transmitter or Receiver. WDMX mode is unlocked only if WDMX ON / OFF is ON.	
			TX LINK	ON/OFF		TX link unlock when the unit is set as a transmitter.	
			TX UNLINK	ON/OFF		Disconnect the transmitter from all receivers. TX unlink unlocks only if WDMX mode is on transmitter.	
			RX RESET	ON/OFF		Total reset of the receiver. RX reset unlocks only if WDMX mode is receiver.	
			IN TO WDMX (TX)	<b>ON/OFF</b>		Enable/Disable the transmission of the DMX values via wdmx.	
			WDMX TO DMX (RX)	<b>ON/OFF</b>		Enable/Disable the retransmission of the DMX from the receiver to the other units connected by cable to the receiver itself.	
			ETHERNET SETTING	ARTNET SETTINGS	IP ADDRESS		Set IP address of the fixture.
					NET		Set Net for ArtNet protocol (Default 0).
		SUBNET				Set Subnet for ArtNet protocol (Default 0).	
		UNIVERSE				Set Universe for ArtNet protocol (Default 0).	
		sACN SETTINGS		IP ADDRESS		Set IP address of the fixture.	
				UNIVERSE		Set Universe for sACN protocol (Default 0).	
				MERGE MODE	<b>OFF/</b> HTP/LTP	Set Merge Mode for sACN protocol.	
		ETHERNET TO DMX		<b>ON</b>		Enable / Disable DMX retransmission from sACN/ArtNet signal to DMX out port.	
OFF							
2	SET UP	SCREEN		BACKLIGHT	ON/ <b>10S</b> /20S/30S		Allows you to select the timing after that display will switch automatically off when unactive.

	FLIP DISPLAY	ON/OFF/AUTO		Allows you to rotate the display by 180°.	
	KEY LOCK	ON/OFF		Allows you lock the buttons on the control panel by a password. Press following combinations (password) in order to access to the user menu : UP, DOWN, UP, DOWN.	
MOVEMENT	PAN REVERSE	ON/OFF		Allows you to reverse Pan movement.	
	TILT REVERSE	ON/OFF		Allows you to reverse Tilt movement.	
	PAN/TILT FEEDBACK	ON/OFF		To activate / deactivate the reading of the feedbacks given by the encoders.	
	MOVEMENT BLACKOUT	ON/OFF		Make fixture goes blackout OFF while moving.	
	PAN/TILT MODE	SLOW/MEDIUM/FAST			To choose the horizontal/ vertical movement speed. SYNC mode will sync movement speed with the whole ASTRAWASH family fixtures.
		HOME POSITION	STANDARD		
		CUSTOM			
	CUSTOM P DEGREE	0°			To choose pan values in case of Custom position.
		45°			
		90°			
135°					
180°					
225°					
270°					
315°					
CUSTOM T DEGREE	0%			To choose tilt values in case of Custom position.	
	12.5%				
	25%				
	50%				
	75%				
	87.5%				
	100%				
FIXTURE SETTINGS	FAN MODE	AUTO/SILENT/HIGH		Select Fan behaviour.	
	COLOR WHEEL BLACKOUT	ON/OFF		To set Gobo Wheel Movement in blackout mode.	
	COLOR WHEEL MODE	STEP			To set Color Wheel Movement scrolling mode.
		COUNTINUOUS			
GOBO WHEEL BLACKOUT	ON/OFF			To set Gobo Wheel Movement scrolling mode.	

		GOBO WHEEL MODE	<b>STEP</b>		To set Gobo Wheel Movement scrolling mode.	
			COUNTINUOUS			
		DMX FAULT	<b>HOLD/BLACKOUT</b>		To choose the behaviour of fixture in case of dmx signal lost.	
		STATUS LED	<b>ON/OFF</b>		To turn the status LEDs on the front panel on or off.	
		DIMMER CURVE	LINEAR/S-CURVE/ <b>SQUARE LAW/ IN-VERSE SQUARE LAW</b>		Select different curve behaviour of dimmer.	
		DIMMER SPEED	<b>AUTO/FAST/MEDIUM/SLOW</b>		Linear dimmer behaviour. Dimmer curve adding long fade. Dimmer curve adding medium fade. Dimmer curve adding little fade.	
		LED FREQUENCY	<b>600HZ/1200 HZ/2000 HZ/4000 HZ/6000HZ/25KHZ/50KHz</b>		Select PWM frequency.	
		INVERT ZOOM	<b>ON/OFF</b>		Invert zoom values.	
		TRANSFER CONFIGURATION	WITHOUT DMX ADDRESS		To transfer the same menu settings of one fixtures to all the other in the daisy chain, including or not the dmx address.	
WITH DMX ADDRESS

# 11 - SHORTCUT

Keys	Mode	Description
UP + DOWN after power on	Flip Display	Directly flip display without enter inside menu
DOWN then power on	Reset without pan/tilt movements	Fixture will be powered on without reset on pan/tilt movements
ENTER + UP then power on	Bootloader	Force firmware upgrade

## 12 - RDM FUNCTIONS

The product can communicate using RDM (Remote Device Management) protocol over a DMX512 Networks.

RDM is a bi-directional communications protocol for use in DMX512 control systems, it is the open standard for DMX512 device configuration and status monitoring.

The RDM protocol allows data packets to be inserted into a DMX512 data stream without affecting existing non-RDM equipment. It allows a console or dedicated RDM controller to send commands to and receive messages from specific fixtures.

The PIDs in the following tables are supported in the product.

RDM is also available on Wireless. WDMX Tiny's Downstream must be enabled in its custom PIDs to work.

## 18 - ERROR MESSAGES

The error is shown on the unit display. In the table below, the "ERROR SHOWED ON SCREEN" column lists the possible errors, accompanied by a possible cause ("POSSIBLE" CAUSES "column).

The color of the error messages (listed in the "COLOR MESSAGES" column) is different for each board it refers to ("PCB" column).

On page 38 you can see the location of the various pcb boards.

ERROR SHOWED ON SCREEN	POSSIBLE CAUSES	POSSIBLE PCB WITH ANOMALY
[DISPLAY BATTERY ERROR]	Recharge The battery on the display board, keeping the product ON for some hours.	1U
	If the error still occurs, the battery is faulty. Replace the battery on the display board.	1U
[LAMP ERROR]	This error message is displayed when the lamp is switched OFF without a command from the product control system.	1U
DMX ACTIVE		1U
MANTENAINE TIME		1U
[IGNITOR FAN ERROR]	Blower for cooling the ignitor failed.	1U
[POWER SUPPLY FAN ERROR]	Blower for cooling the power supply failed.	1U
[PAN/TILT PCB ERROR]	Pan tilt pcb not detected.	2U
[PAN MOTOR ERROR]	This message will appear after the reset of the product if: <ul style="list-style-type: none"> <li>• the PAN magnetic-indexing circuit. detect a failure (sensor failed or magnet is missing) .</li> <li>• or the stepping motor is defective</li> <li>• or its driving IC on the PCB is defective.</li> <li>• or the product is not located in the default position after the reset of the fixture.</li> </ul>	2U
		2U
		2U
		2U
		2U
[PAN LOCKED]	Pan is locked.	2U
[TILT MOTOR ERROR]	This message will appear after the reset of the product if: <ul style="list-style-type: none"> <li>• the TILT magnetic-indexing circuit detect a failure (sensor failed or magnet is missing).</li> <li>• or the stepping motor is defective.</li> <li>• or its driving IC on the PCB is defective.</li> <li>• or the product is not located in the default position after the reset of the fixture.</li> </ul>	2U
		2U
		2U
		2U
		2U
[TILT LOCKED]	Tilt is locked.	2U
[PAN SENSOR ERROR]	Pan sensor not detecteld.	2U
[TILT SENSOR ERROR]	Tilt sensor not detecteld.	2U
[PAN ENCODER ERROR]	Pan encoder not detecteld.	2U
[TILT ENCODER ERROR]	Tilt encoder not detecteld.	2U
[MOTOR PCB 2 ERROR]	Motor pcb 3U not detected.	3U
[ROTATING GOBO WHEEL ERROR]	Failure detected during the reset of the rotating gobo wheel, if this wheel is not located in the default position.	3U
[GOBO FAN ERROR]	Blower for cooling the GOBO wheel failed.	3U
[ANIMATION WHEEL ERROR]	Failure detected during the reset of the animation wheel, if this wheel is not located in the default position.	3U

<b>ERROR SHOWED ON SCREEN</b>	<b>POSSIBLE CAUSES</b>	<b>POSSIBLE PCB WITH ANOMALY</b>
[ANIMATION WHEEL ROT. ERROR]	Failure detected during the reset of the rotation of the animation wheel, if this wheel is not located in the default position.	3U
[CMY FAN ERROR]	Blower for cooling the CMY module failed.	3U
[MAGENTA ERROR]	Failure detected during the reset of the Magenta flag, if the Magenta flag of the CMY module is not located in its default position.	3U
[YELLOW ERROR]	Failure detected during the reset of the Yellow flag, if the Yellow flag of the CMY module is not located in its default position.	3U
[CYAN ERROR]	Failure detected during the reset of the Cyan flag, if the Cyan flag of the CMY module is not located in its default position.	3U
[GOBO ROTATION ERROR]	Failure detected during the reset of the rotation of the rotating gobo, if the rotating gobos are not located in the default positions.	3U
[STATIC GOBO WHEEL ERROR]	Failure detected during the reset of the static gobo wheel, if this wheel is not located in the default position.	3U
[MOTOR PCB 3 ERROR]	Motor pcb 4U not detected.	4U
[FROST ERROR]	Failure detected during the reset of the effect FROST, if this effect is not located in the default position.	4U
[4F PRISM ERROR]	Failure detected during the reset of the 4F effect prism, if this effect is not located in the default position.	4U
[8F PRISM ERROR]	Failure detected during the reset of the 8F effect prism, if this effect is not located in the default position.	4U
[4F PRISM ROTATION ERROR]	Failure detected during the reset of the 4F effect prism rotation, if this effect is not located in the default position.	4U
[8F PRISM ROTATION ERROR]	Failure detected during the reset of the 8F effect prism rotation, if this effect is not located in the default position.	4U
[FOCUS ERROR]	Failure detected during the reset of the FOCUS, if the focus lens is not located in its default position.	4U
[ZOOM ERROR]	Failure detected during the reset of the ZOOM system, if the focus lens is not located in its default position.	4U
[LAMP AIR IN (LOW) FAN ERR.]	Air in blower for cooling the lamp failed, the lamp has been switched OFF.	4U
[LAMP AIR OUT (UP) FAN ERR.]	Air out blower for cooling the lamp failed, the lamp has been switched OFF.	4U
[SHUTTER 1 ERROR]	Failure detected during the reset of the effect SHUTTER, if this effect is not located in the default position.	4U
[SHUTTER 2 ERROR]	Failure detected during the reset of the effect SHUTTER, if this effect is not located in the default position.	4U

<b>ERROR SHOWED ON SCREEN</b>	<b>POSSIBLE CAUSES</b>	<b>POSSIBLE PCB WITH ANOMALY</b>
[SPOT FILTER ERROR]	Failure detected during the reset of spot filter, if the rotating gobos are not located in the default positions.	4U
[FAN PCB ERROR]	Fan PCB not detected.	5U
[LAMP RIGHT FAN ERROR]	Right blower for cooling the lamp failed, the lamp has been switched OFF.	5U
[LAMP LEFT FAN ERROR]	Left blower for cooling the lamp failed, the lamp has been switched OFF.	5U
[LAMP TEMPERATURE ERROR]	This error message indicates that an overheating on the lamp has occurred and the lamp has been switched OFF by the product protection system.	5U
[IGNITOR TEMPERATURE ERROR]	This error message indicates that an overheating on the ignitor has occurred and the lamp has been switched OFF by the product protection system.	5U
[LAMP TEMP. SENSOR ERROR]	LAMP sensor damaged (open or in short circuit).	5U

Fig. 13

## 19 - PERIODICAL CLEANING

WARNING! Turn OFF power and allow approximately 20 minutes for the fixture to cool down.

Before removing rear cover, place the head in a horizontal position and engage both the PAN and TILT locks for added stability. See the "PAN AND TILT LOCK" paragraph (pag. 6). Loosen and remove the marked screws and opening the head covers (1) from both sides.

Use a soft cloth dampened with any detergent liquid for cleaning glass to remove the dirt from the reflectors, from the lenses and filters.

Unclip the safety cable on both sides (2).

Fig. 14

## 20 - GOBOS REPLACEMENT

Open the head covers (see the "PERIODICAL CLEANING" paragraph, point 1).  
Gently remove the gobo holder from the gobo wheel (3, 4).

Remove the spring and the gobo (5, 6).

Fig. 15

## 21 - BLADE AND CMY MODULES REMOVAL

Open the head covers (see the "PERIODICAL CLEANING" paragraph, points 1 and 2).

Push up the focus lens (1-A).

Disconnect the two connectors (1-B) and unscrew the two screws marked on the front view (1-C). Then remove the Blade module (2-B).

Disconnect the two connectors (3-A) and unscrew the two marked screws on the other side (4-A). Then remove the CMY module (4-B).

Fig. 16

## 22 - MAINTENANCE

### MAINTENANCE AND CLEANING THE PRODUCT

**WARNING:** Disconnect from the mains before starting any maintenance work

It is recommended to clean the front at regular intervals, from impurities caused by dust, smoke, or other particles to ensure that the light is radiated at maximum brightness.

- For cleaning, disconnect the main plug from the socket. Use a soft, clean cloth moistened with a mild detergent. Then carefully wipe the part dry. For cleaning other housing parts use only a soft, clean cloth. Never use a liquid, it might penetrate the unit and cause damage to it.
- The user must clean the product periodically to maintain optimum performance and cooling. The user may also upload firmware (product software) to the fixture via the DMX signal input port or USB port using firmware and instructions from PROLIGHTS.
- The frequency of such maintenance operations is to be performed according to various factors, such as the amount of the use and the condition of the installation environment (air humidity, presence of dust, salinity, etc.). It is recommended that the product is subject to annual service by a qualified technician for special maintenance involving at least the following procedures:
  - General cleaning of internal parts.
  - For all the parts subject to friction, using lubricants specifically supplied by PROLIGHTS.
  - General visual check of the internal components, cabling, mechanical parts, etc.
  - Electrical, photometric and functional checks; eventual repairs.
  - Cleaning the lenses. Only use neutral soap and water to clean the lenses, then dry it carefully with a soft, non-abrasive cloth.

**WARNING:** the use of alcohol or any other detergent could damage the lenses.

- All other service operations on the product must be carried out by PROLIGHTS, its approved service agents or trained and qualified personnel.
- It is PROLIGHTS policy to apply the strictest possible calibration procedures and use the best quality materials available to ensure optimum performance and the longest possible component lifetimes. However, optical components are subject to wear and tear over the life of the product, resulting in gradual changes in colours over many thousands of hours of use. The extent of wear and tear depends heavily on operating conditions and environment, so it is impossible to specify precisely whether and to what extent performance will be affected. However, you may eventually need to replace optical components if their characteristics are affected by wear and tear after an extended period of use and if you require fixtures to perform within very precise optical and colour parameters.
- Do not apply filters, lenses or other materials on lenses or other optical components. Use only accessories approved by PROLIGHTS.

### REPLACING THE FUSE

**WARNING:** Before replacing the fuse, unplug the product from the mains.

- Remove the old fuse from the housing with a suitable screwdriver (anticlockwise) and replace it with one of the same type and of the same classification (T8A 250V).

### VISUAL CHECK OF PRODUCT HOUSING

- The parts of the product cover/housing should be checked for eventual damages and breaking start at least every two months. In addition, especially the parts of the front lens holder have to be checked mechanically (by means of movement by the part) if it is firmly fastened to the fixture. If hint of a crack is found on some plastic part, do not use the product until the damaged part will be replaced.
- Cracks or another damages of the cover/housing parts can be caused by the product transportation or manipulation and also ageing process may influence materials.
- This checking is necessary for both fixed installations and preparing product for renting. Any free moving parts inside of the product, cracked cover/housing or any part of front lens not sitting properly in place need to be immediately replaced.

## TROUBLESHOOTING

Problems	Possible causes	Checks and remedies
Product doesn't power ON	<ul style="list-style-type: none"> <li>No power to the product</li> </ul>	<ul style="list-style-type: none"> <li>Check that power is switched ON and cables are plugged in.</li> </ul>
	<ul style="list-style-type: none"> <li>Fuse blown or internal fault</li> </ul>	<ul style="list-style-type: none"> <li>Check if the Fuse is intact and eventually replace it if necessary.</li> <li>Contact the PROLIGHTS Service or authorized service partner. Do not remove parts and/or covers, or carry out any repairs or service that are not described in this Safety and User Manual unless you have both authorization from PROLIGHTS and the service documentation.</li> </ul>
Product reset correctly but does not respond correctly to the controller.	<ul style="list-style-type: none"> <li>Bad signal connection</li> </ul>	<ul style="list-style-type: none"> <li>Inspect connections and cables. Fix eventual bad connections. Repair or replace damaged cables.</li> </ul>
	<ul style="list-style-type: none"> <li>Signal connection not terminated</li> </ul>	<ul style="list-style-type: none"> <li>Insert DMX termination plug in signal output socket of the last product on the signal line.</li> </ul>
	<ul style="list-style-type: none"> <li>Incorrect addressing of the product</li> </ul>	<ul style="list-style-type: none"> <li>Check the product address and control settings</li> </ul>
	<ul style="list-style-type: none"> <li>One of the product is defective and is corrupting the signal transmission on the signal line</li> </ul>	<ul style="list-style-type: none"> <li>Unplug the XLR in and out connectors and connect them directly together to bypass one product at a time until normal operation is regained. Once found the error, have that fixture serviced by a qualified technician.</li> </ul>
Timeout error after fixture reset.	<ul style="list-style-type: none"> <li>One or more hardware components requires mechanical adjustments</li> </ul>	<ul style="list-style-type: none"> <li>Check product stored error messages for more information. Contact PROLIGHTS Service or an authorized service partner.</li> </ul>
Mechanical effect loses position	<ul style="list-style-type: none"> <li>Mechanical hardware require cleaning, adjustment or lubrication</li> </ul>	<ul style="list-style-type: none"> <li>Check product stored error messages for more information. Contact PROLIGHTS Service or an authorized service partner.</li> </ul>
Light output turn OFF Intermittently	<ul style="list-style-type: none"> <li>Fixture is too hot</li> </ul>	<ul style="list-style-type: none"> <li>Check product stored error messages.</li> <li>Allow product to cool.</li> <li>Clean the product and airflow filters.</li> <li>Reduce ambient temperature.</li> </ul>
	<ul style="list-style-type: none"> <li>Hardware failure (temperature sensor, fans, Light source...)</li> </ul>	<ul style="list-style-type: none"> <li>Check product stored error messages for more information. Contact PROLIGHTS Service or an authorized service partner.</li> </ul>
General low light intensity	<ul style="list-style-type: none"> <li>Dirty lens assembly</li> </ul>	<ul style="list-style-type: none"> <li>Clean the fixture regularly.</li> </ul>
	<ul style="list-style-type: none"> <li>Dirty or damaged filters</li> </ul>	<ul style="list-style-type: none"> <li>Install lens assembly properly.</li> </ul>

Contact an authorized service center in case of technical problems or not reported in the table can not be resolved by the procedure given in the table.
