

EclProfile FWHPVW

450W high quality VariableWhite LED ellipsoidal, compatible with PRL and PRLZ lenses

ORDER CODE: **ECLFWHPVWBK**

The **EclProfile** FWHPVW elevates the benchmark in LED ellipsoidals by delivering 450 Watts of fixture power, effectively doubling its lumen output to an impressive 15,500 lumens. Retaining the renowned VariableWhite LED engine of the FW series, it offers superior color rendering for unparalleled light quality. Specifically designed for longer throw distances and higher hanging positions, the FWHP is the ideal replacement for traditional HPL 750W and 2kW tungsten fixtures, excelling in large venues such as theaters, studios, and auditoriums.

The **EclProfile** FWHP offers precision CCT reproduction and user-friendly operation. The enhanced 2.4-inch display, complemented by four RGB backlit, pushable encoders, ensures a streamlined user experience. This innovation delivers intuitive control across multiple operating modes, ensuring consistency and efficiency for professionals. Despite its increased output, the fixture maintains the compact dimensions of its predecessor, offering compatibility with industry-standard fixed-angle and zoomable lenses, including the PRL and PRLZ lenses. This ensures seamless integration with existing inventories, making it a versatile and cost-effective solution for diverse lighting needs.
