

BUBBLE-01

04893

DESCRIPTION

Bubble machine

FEATURES

- The fan produces air which is exactly directed into the eyelet of the blade to avoid sprinkling fluid on the floor.
- The bubbles that are produced have different sizes.
- This machine works with a special, ready-to use liquid.
- The fluid is to be poured into the appropriate 0.75 liters tank which enables the machine to work continuously for about half an hour.
- Don't use ordinary soap solutions, use JB Systems "bubble" liquid (order code: 1911) instead.
