ADP-12S

DATA SHEET pag.1/2 V.12.03

- Class D Powered
- Integrated Digital Processing
- Internal temperature control
- Electronic protection
- High quality components
- Online monitoring available
- Bass reflex sub unit

APPLICATION:

- Front fill/ Side fill/ reinforcement
- Smaller clubs/ discos
- Smaller Live stages/ events
- Portable installation

GENERAL DESCRIPTION:

The compact ADP-12S sub bass cabinet is part of the ADP Self powered, DSP integrated Series. It has been designed to offer the utmost sound reinforcement reliability, incorporating the latest acoustical and electronical technology and delivering incredible, dynamic sound.

The ADP-12S is an extremelly high power sub bass cabinet providing exceptional low frequency reinforcement for the ADP Full range cabinets. It uses one 12" (4" ISV voice coil) neodymium transducer with double spider (for improved linearity) in direct radiation bass reflex configuration.

The ADP-12S is powered with a total of 1000W of class D amplification. Each cabinet has a DSP integrated for system protection and optimization. Other features include temperature sensor, fan speed control, Ethernet options and many more.

The ADP-12S has an unbeatable power to size ratio, there is no need for external amplification racks, is very Light weight and as such is the ideal solution for portable or fixed sound reinforcement enabling quick and easy set-ups. An integrated pole mount enables easy satellite configuration with the ADP full range cabinets.

SPECIFICATIONS:

FREQUENCY RANGE 40Hz -180Hz

FREQUENCY RESPONSE 45Hz- 150Hz ± 3dB

COVERAGE 360° one unit

MAX SPL 131dB/ 134dB peak 1w@ 1m

TRANSDUCER 12" Custom Neodimium + 4" ISV voice coil

CONFIGURATION Bass-reflex, Direct radiation

POWER AMPLIFIER 1000W Class D with Switching Power supply

DSP Internal LYNX digital processor DSPB-22®

CABINET ADJUSTMENT Back panel LCD screen

INTERNAL CONTROLS Temperature sensor / Fan Speed control

SIGNAL CONNECTION NEUTRIK connectors XLR Male Input
XLR Female Loop Thru

CONTROL CONNECTIONS USB (DSP programming), ETHERNET* (Online Monitoring System OMS®)

ETHERNET* (Online Monitoring System Of

AC POWER 230v / 115v selectable. 50/60 Hz 5A

AC CONNECTIONS 16A NEUTRIK POWERCON with Looping Output

CONSTRUCTION 18 mm Premium Birch plywood

FINISH High resistant water-based black paint

FRONT DESIGN Black antirust steel grille

DIMENSIONS (H x W x D) 495 x 380 x 644 mm

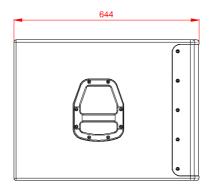

WEIGHT 29 Kg (64 lbs)

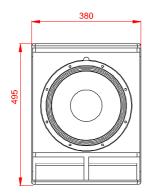

* Ethernet connection is optional.

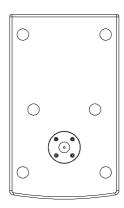

DATA SHEET pag.2/2 V.12.03

Dimmensions in mm.

KEY FEATURES AND BENEFITS:

SELF POWERED

1000w Class D with switching power supply amplifier for the $12^{\prime\prime}$ transducer. The amplification far exceeds the transducer needs thus resulting in high output, high damping factor and extremely low levels of distortion

DIGITAL PROCESSING & DOUBLE DYNAMICS Latest generation 24bit/96Khz digital processor which optimizes the system components. It includes 2 channel processing electronics with functions for phase correction, driver protection, gain control, equalization and crossover, using double precision filters with 56bit internal processing. This enables a noticeable reduction in distortion with clean and clear equalization. The DSP incorporates sophisticated double protection limitation; RMS and Peak. The RMS limiter is used to adjust the transducer reproduction level, maintaining the original dynamics whilst at the same time respecting the original transients and achieving a better acoustical result. The Peak limiter controls the movement of the speaker, protecting it from any damage and also reducing distortion caused by over-excursion. These double dynamics lower levels of distortion and provide protection for all the speaker components and internal electronics.

TEMPERATURE & PROTECTION CONTROL

Via internal sensors a micro controller analyzes in real time the temperature of each power module. It then automatically adjusts the fan speed to apply the correct temperature dissipation, reducing both the speed of the fan and the noise generated leaving the system as quiet as possible.

COMPONENTS

Low frequency transducer with rubber surround, Doped Nomex® suspension, double spider for improved control and linearity and a 4" Interleaved sandwich voice coil. Weather protected membrane for outdoor use.

HARDWARE

Cabinet constructed from premium birch plywood and finished with high-resistant water based black paint.

SOFTWARE:

ONLINE MONITORING SYSTEM

Offers detailed system information for each cabinet and via ethernet or PC monitors the cabinet/s in real

- RAINBOW

Acoustical Prediction software for accurate loudspeaker planning offering both horizontal and vertical views.
